

Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

1-29. (Canceled)

30. (Currently amended) A portable apparatus for a health management comprising:

a display device having a pixel ~~portion~~ circuit, a driver circuit for driving the pixel circuit, and a controller for controlling the driver circuit, which are formed between a pair of substrates;

a sealing material formed between the substrates; and

a body temperature measurement connected to the controller,

wherein the sealing material covers the controller.

31. (Previously presented) A portable apparatus according to claim 30, wherein the display device is a liquid crystal display device.

32. (Withdrawn) A portable apparatus according to claim 30, wherein the display device is an EL display device.

33. (Withdrawn) A portable apparatus according to claim 30, wherein the portable apparatus further comprises a blood pressure measurement.

34. (Withdrawn) A portable apparatus according to claim 30, wherein the portable apparatus

further comprises a pulse rate measurement.

35. (Currently Amended) A portable apparatus for a health management comprising:  
a display device having a pixel ~~portion~~ circuit, a driver circuit for driving the pixel circuit, and a controller for controlling the driver circuit, which are formed between a pair of substrates;  
a sealing material formed between the substrates; and  
a body temperature measurement connected to the controller by a lead out cable, wherein the sealing material covers the controller.

36. (Previously presented) A portable apparatus according to claim 35, wherein the display device is a liquid crystal display device.

37. (Withdrawn) A portable apparatus according to claim 35, wherein the display device is an EL display device.

38. (Withdrawn) A portable apparatus according to claim 35, wherein the portable apparatus further comprises a blood pressure measurement.

39. (Withdrawn) A portable apparatus according to claim 35, wherein the portable apparatus further comprises a pulse rate measurement.

40. (Currently Amended) A portable apparatus for a health management comprising:  
a display device having a pixel ~~portion~~ circuit, a driver circuit for driving the pixel circuit, and a controller for controlling the driver circuit, which are formed between a pair of substrates;  
a sealing material formed between the substrates; and  
a body temperature measurement connected to the controller by an infrared signal,

wherein the sealing material covers the controller.

41. (Previously presented) A portable apparatus according to claim 40, wherein the display device is a liquid crystal display device.

42. (Withdrawn) A portable apparatus according to claim 40, wherein the display device is an EL display device.

43. (Withdrawn) A portable apparatus according to claim 40, wherein the portable apparatus further comprises a blood pressure measurement.

44. (Withdrawn) A portable apparatus according to claim 40, wherein the portable apparatus further comprises a pulse rate measurement.

45. (Previously presented) An active matrix display device comprising:

- a first substrate;

- a second substrate opposed to the first substrate;

- a liquid crystal material formed between the first substrate and the second substrate;

- a sealing material formed between the first substrate and the second substrate;

- a pixel region comprising a plurality of TFTs formed over the first substrate;

- a driver circuit comprising a plurality of TFTs for driving the pixel region, formed over the first substrate; and

- a controller for controlling the driver circuit formed over the first substrate,

- wherein the sealing material covers the controller.

46. (Previously presented) An active matrix display device according to claim 45, wherein the controller is connected to a body temperature measurement.

47. (Previously presented) An active matrix display device according to claim 45, wherein the controller is connected to a blood pressure measurement.

48. (Previously presented) An active matrix display device according to claim 45, wherein the controller is connected to a pulse rate measurement.

49. (Previously presented) An active matrix display device comprising:

- a first substrate;
  - a second substrate opposed to the first substrate;
  - a liquid crystal material formed between the first substrate and the second substrate;
  - a sealing material formed between the first substrate and the second substrate;
  - a pixel region comprising a plurality of TFTs formed over the first substrate;
  - a driver circuit comprising a plurality of TFTs for driving the pixel region, formed over the first substrate; and
  - a CPU formed over the first substrate,
- wherein the sealing material covers the CPU.

50. (Previously presented) An active matrix display device according to claim 49, wherein the controller is connected to a body temperature measurement.

51. (Previously presented) An active matrix display device according to claim 49, wherein the controller is connected to a blood pressure measurement.

52. (Previously presented) An active matrix display device according to claim 49, wherein the controller is connected to a pulse rate measurement.
